STATEMENT OF PURPOSE: Assisted Living Residences (ALR) provide 24-hour residential care for adults. They are not medical facilities. Persons in need of constant medical care and medical supervision should not be admitted or retained in these settings because the facilities lack the staff and expertise to provide needed services. These settings are for persons who, by reason of age and/or physical and/or mental limitations are in need of assistance with activities of daily living, and can be cared for in the adult residential care settings listed above.

ALRs with advanced training (Licensed Practical Nurse) may serve people who need chronic assistance from another person with ambulation, transfer, ascending / descending stairs; are dependent on medical equipment and require more than intermittent or occasional assistance from medical personnel; or have chronic, unmanaged urinary or bowel incontinence. I certify that I have physically examined this patient and have accurately described the individual’s medical condition, medication regimen and need for skilled and/or personal care services. Based on this examination and my knowledge of the patient, this individual:

IS IS NOT in need of continual acute or long term medical or nursing care or supervision which would require placement in a hospital or nursing home.

IS IS NOT in need of 24-hour skilled nursing care.
